

## Albers Dual Business Degrees

The Albers dual degree programs are designed to allow students to complete both degrees in less time than if the two degrees were obtained independently outside the program. Due to the complexity of degree requirements, students should work closely with their adviser throughout their programs.

Students participating in this program must:

- Apply to each program separately
- Meet all admissions standards for each program
- Complete all prerequisites for both programs
- Declare their participation in the second program before completing at least 75% of the first degree program they enroll in.
