TIL321A 7-SEGMENT RED LED DISPLAY

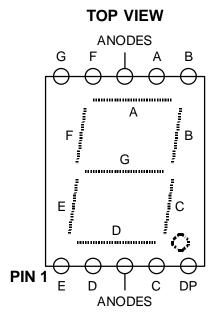

ABSOLUTE MAXIMUM RATINGS:

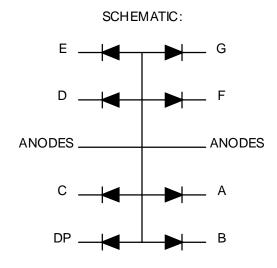

- Reverse voltage at $25^{\circ}C = 5 V$
- Peak forward current at 25°C = 150 mA per segment
- Average forward current at 25°C = 25 mA per segment
- Operating free-air temperature = -40° C to 85° C
- Lead temperature 1.6 mm below seating plane for 5 seconds = 250°C

OPERATING CHARACTERISTICS:

- Luminous intensity at 10 mA per segment = 125 μcd
- Wavelength at peak emission = 655 nm
- Spectral bandwidth = 20 nm
- Static forward voltage at 20 mA per segment = 1.7 V
- Static reverse current at Vr of 5 V = 100 μ A

CAUTION: You must use current limiting when driving this device!
