

Welcome to the Mechanical Engineering Department at Seattle University!

As a student in our undergraduate and graduate programs you join an inclusive, collaborative, and growing department. When you participate, engage and pursue a degree with Seattle U's mechanical engineering programs, you will graduate with the skills employers are looking for.

We proudly offer:

- Direct admission into the Bachelor of Science and the Master of Science in Mechanical Engineering programs
- A collaborative environment where students work together and under faculty supervision to enhance and maximize their learning
- Small classes and labs taught by faculty committed to student learning and development into successful engineers
- Frequent interactions with experts from leading companies and permanent on-campus presence of an Industry Advisor, in combination with effective career development, internship and job placement resources
- Year-long, industry-sponsored senior design projects as a degree requirement facilitated through our 32-year old Project Center, one of the oldest in the United States
- Quarterly faculty advising that optimize academic achievement, prepare students for professional success and enrich their educational experience
- Scholarships available for incoming engineering freshman, transfer and graduate students

As we begin the 2019-2020 school year, we welcome our incoming freshmen, transfer and new MSME students! We are looking forward to learning prospects made possible through our \$1.86M grant from the National Science Foundation, and generous gifts of time, talent, and treasure from our alumni and friends.

I wish you all a wonderful year ahead as you embrace the opportunities and experiences that you encounter in the classroom and beyond as you prepare for your future in mechanical engineering.

Sincerely,

Dr. Teodora R. Shuman

Professor and Department Chair, Mechanical Engineering Department
