CSI Construction Updates for the Month of September:

**New Building construction site:**

- In the month of September, all the large underground footings supporting the new building were installed. The last mat footing was completed on October 1st.

- In October Skanska will install the smaller footings under the columns and around the perimeter of the building.

- Installation of underground utilities, included storm drainage, plumbing and electrical will continue inside the construction fence throughout the month of October.

**Lower Mall and Marion Street Activities:**

- The utility trench in lower mall was completed in September.

- Paving on lower mall and Marion has been repaired.

---

**Fun Fact:**

- Each concrete floor in the building will use approximately 650 yards of concrete.
