

# 2019 COURSE GUIDE

SUMMER SESSION 2019			
June	July	August	September
8-Week Session June 24 - August 17		Intersession August 19 - Sept 14	
1st 4-Week June 24 - July 20	2nd 4-Week July 22 - August 17		

## Summer 2019 Innovative Course Highlights

### ENGL 3910-01: Grant Writing

Grant writing is one of the most valuable skills that you can bring with you to the workplace—but how can you learn how to do it? No matter what your major or career plans, this class introduces you to the resources you'll need and coaches you through the process of writing your own complete grant proposal. By the end of summer, you'll know how to take your own next professional steps—and how to stand out in job interviews and graduate school applications as someone who knows how to get the funds.

8-week session | Online | Susan Meyers

### THRS 3910-01: Mindful Eating - Conscious Living

In this course, we will explore our capacity to be present in all facets of our lives through the particular study of mindful eating which will be but one of many examples and objects of our mindfulness inquiry. In this course, you can expect plenty of in class discussions, daily mindfulness practice and inquiry both in the classroom and as home practice, significant reading about mindfulness, a visit or two to a local mindfulness center and/or guest lecturers with local practitioners.

Intersession | Lecture | Sharon Suh

### UCOR 3400-01: Scientific Controversies

How do we come to believe what we believe about science and nature? As a way to better understand how the public comes to accept or reject scientific ideas, this course specifically examines controversies about science in the public sphere, including vaccinations, evolution, genetic engineering, climate change, and more. Students will learn to understand how science is communicated to public audiences, the moral and ethical dimensions of science, the relationship between science and race, gender and class, the financial interests backing scientific research, and the complex ways in which expertise, trust and fame shape a scientist's success or failure. This course is appropriate for both science majors and non-science majors.

8-week session | Hybrid | Julie Homchick Crowe

### MGMT 4910-01: Advanced Leadership Through Athletics

This course will expand on and apply the lessons explored in Leadership Through Athletics, in pursuit of excellence as leaders. Students will examine how leaders communicate through storytelling: galvanizing their followers and allies by painting a vivid picture of the vision, strategies and tactics that motivate others to new heights. Students will discuss the challenging legal issues in sport today and explore how leaders struggle to make ethical and legal business decisions. The course is design for both student—athletes and non-student—athletes who are interested in taking their leadership skills to the next level and applying them in world class athletic and organizational endeavors.

8-week session | Lecture | Randy Massengale & Kelli Rodriguez Currie

### UCOR Courses | 1st 4-Week Session | June 24 - July 20

SECTION NUMBER	SECTION TITLE	INSTRUCTOR
UCOR-1100-01	Ecocriticism and Sustainability	Roberts, Christina
UCOR 2900-01	Ethical Reasoning	Dominick, Yancy

### UCOR Courses | 2nd 4-Week Session | July 22 - August 17

SECTION NUMBER	SECTION TITLE	INSTRUCTOR
UCOR 1810-01	The Chemistry of Food and Cooking	Alaimo, Peter

### UCOR Courses | Intersession | August 19 - September 14

SECTION NUMBER	SECTION TITLE	INSTRUCTOR
UCOR 2900-02	Ethical Reasoning	Imanaka, Jessica

### UCOR Courses | 8-Week Session | June 24 - August 17

SECTION NUMBER	SECTION TITLE	INSTRUCTOR
